You have our word that these plants were treated in a way that respects our customers' expectations for high quality, pest and residue-free plant material.

Our Integrated Pest Management (IPM) program preventatively utilizes biological control agents (BCA's) on all plant material.

Since our IPM program began in 2016, our chemical usage has decreased by 66%, while maintaining control of pest populations.

Our program delivers a lean plant that is free of any long-term pesticide residues that can harm beneficial insects and pollinators.

## Partners with Nature

Gro'n Sell has partnered with **Koppert** to design a highly-customized IPM program primarily utilizing predatory insects and mites. These predators leave little to no evidence of their meals on your plant material and can be quite difficult to find when food sources are low. Together, we're all **Partners with Nature**.
